Experience

Blue Torus

Mar 2023 – Present

Backend & Tooling Engineer

Accra, Ghana

- Developed and deployed an internal web application for managing employee schedules, food preferences, and tasks, with automated reporting, admin controls, and email notifications.
- Designed and built a reusable JSON-driven configuration system for multiple 3D product configurators, modeling product rules, valid and invalid combinations, UI actions, and Zustand state to eliminate product-specific UI implementations.
- Built an LLM-powered natural-language interface for 3D configurators that translated user requests into structured actions, using product configuration and application state to safely modify properties such as color and other product attributes.
- Contributed to multiple web-based 3D visualization and interactive projects using Three.js and Next.js.

Freelance

Sep 2022 – Present

Software Engineer

Accra, Ghana

- Designed and developed multiple e-commerce marketplaces with integrated payment processing via Paystack.
- Developed a backend service for tax and payroll calculation, providing API endpoints for automated tax processing and compliance reporting.
- Implemented a UI/UX redesign for an insurance platform.
- Developed a build script for generating custom Tails OS distributions.

Accra Technical University

Oct 2021 – Sep 2022

Teaching Assistant

Accra, Ghana

- Instructed web development fundamentals, teaching HTML/CSS/JavaScript, PHP, and Oracle APEX through hands-on projects and practical exercises.
